

Merge OrthoPACS™

An image capture and storage solution designed for orthopaedics

50% of all digital orthopaedic groups use solutions from Merge Healthcare.

You know that in today's market digital imaging is a necessity. However, you want to make sure your surgeons also benefit from a solution that manages clinical needs from patient visits to the operating room and beyond.

Now you can.

How We Help You

Merge OrthoPACS lets orthopaedic surgeons access images taken at multiple locations in a single viewer, diagnose from anywhere using a remote viewer, plan for surgery with digital templating, and securely archive studies. The outcome? Faster results and more efficient care from an integrated orthopaedic imaging solution.

Merge OrthoPACS is an image management and digital templating solution designed for orthopedics.

With Merge OrthoPACS You Can

Securely store and instantly access digital images from any web-based location

Reduce overhead, see more patients, and repurposes space simply by eliminating film

Deliver faster results to referring physicians and patients, share your findings digitally

Plan for accuracy with digital templating and orthopaedic measurements specific to surgeon needs pre and postoperatively

Simplify IT deployment and support with system dependability from any location, any device

Merge Orthopaedic Solutions

Merge Orthopaedic Solutions provide a suite of solutions developed for the specific needs of the orthopaedic practice, from patient information to image management and pre-surgical planning. The integrated solution allows orthopaedic surgeons to meet Meaningful Use with toolsets and workflows designed to drive orthopaedic efficiency and workflow needs start to finish.

Merge Orthopaedic Solutions have been developed by orthopaedic surgeons and specialists, providing systems and tools that mirror clinical workflow and patient care today, increasing the long-term adoptability and satisfaction of users. Imaging and data sharing promote interoperability, without forcing conformance to non-specialty hospital-based solutions.

Merge Orthopaedic Solutions

- + Merge OrthoEMR™:**
Record more than patients' visits with a web-based, easy-to-use orthopaedic workflow EMR that is certified for Meaningful Use and designed for your orthopaedic practice today for efficiency gains tomorrow.
